

Make a résumé

This is a template example for making a colorful curriculum vitae or résumé using RMarkdown and RStudio. You can use this template to use R and RMarkdown capabilities to make a fun curriculum vitae or résumé.

This template uses the vitae library.

Usage

Fork this repo and edit the `make_resume.Rmd` in `rmd_file` folder.

You can either edit the `make_resume.Rmd` file directly in Github or edit from your computer terminal in a RStudio IDE environment and render in either HTML or PDF.

An example is shown below:
